WORK EXPERIENCE

Senior Software Engineer

Mar 2022 - Present

Meridian Data Systems, San Francisco, CA

- Designed and shipped a real-time data ingestion pipeline in Python and Kafka processing 40 million events per day, reducing end-to-end latency from 12 minutes to under 90 seconds.
- Led migration of 14 legacy services from EC2 to Kubernetes on AWS, cutting monthly infrastructure spend by 31 percent and deployment time from 45 minutes to 6 minutes.
- Built an internal query optimization layer over PostgreSQL that reduced p95 dashboard load times by 58 percent for 2,000 daily active users.
- Mentored 3 junior engineers through structured code review and design sessions; 2 were promoted within 18 months.

Software Engineer

Jun 2018 - Feb 2022

Brightpath Technologies, San Jose, CA

- Developed REST APIs in Python (Flask) serving 5 customer-facing products, sustaining 99.95 percent uptime across 3 years of production operation.
- Rewrote a C++ image processing module used in the core product, improving throughput by 3.2x and eliminating a class of memory leaks reported by 40+ enterprise customers.
- Implemented automated integration test coverage from 22 percent to 81 percent, reducing production incidents by roughly half year over year.

EDUCATION

B.S. Computer Science

Sep 2014 - Jun 2018

University of California, Davis

SKILLS

Python, C++, SQL, PostgreSQL, AWS, Docker, Kubernetes, Kafka, REST APIs, Git
